Monthly Rates

New this year, our School Age programs will be invoiced using a flat monthly rate based on the average number of monthly instructional school days for the school year. This rate is fixed regardless of whether there are fewer school days than average (typically December and March) or if there are more school days than average (typically October, January, May, and June). We believe this will be much less confusing and better for our families to have a consistent rate to pay each month.
